Atvirojo kodo reikšmė visuomenei

Ir visa tai- kenkėjiškos technologijos!

"At present…severe economic damage [is being done] to the property rights of owners of copyrights in sound recordings and musical composition….Unless something meaningful is done to respond to the…problem, the industry itself is at risk."

Alan Greenspan. Testimony before Congress, 1983.

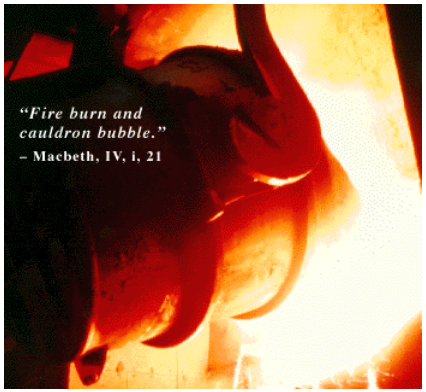
"The VCR is to the American film producer and the American public as the Boston Strangler is to a woman alone."

Jack Valenti, President of the MPAA. Testimony before Congress, 1982.

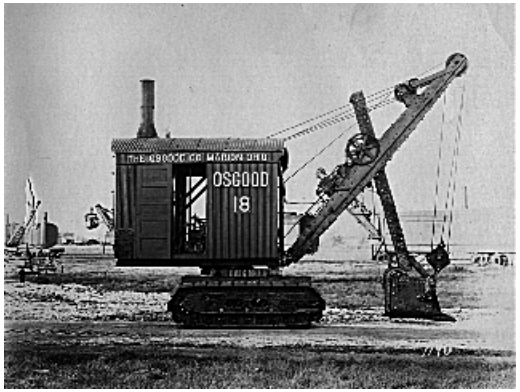
"As the majority of hobbyists must be aware, most of you steal your software…. [Y]ou…prevent good software from being written…. I would appreciate letters from any one who wants to pay up."

Bill Gates, "An Open Letter to Hobbyists," 1976.

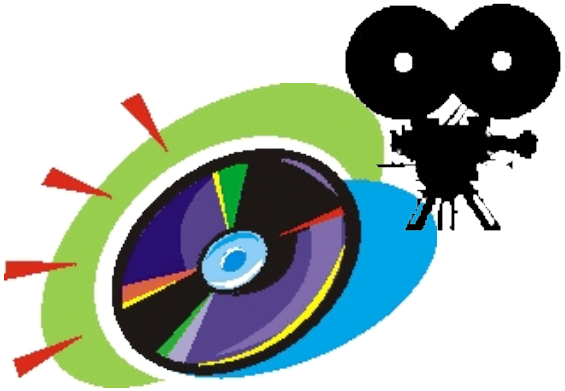
Griaunančios technologijos!



Plienas – Thin Slab Continuous Casting



Garo ekskavatoriai- Hidraulika



Entertainment – Digital Media

Spausdinimo mašinėlė – Elektra, Kompiuteris

Griaunanti jėga

Is it Linux: either the kernel or distribution?

Is the real disruption really a new process - open collaboration for development?

It appears that the disruption extends beyond software. Consider: WikiPedia – Open Content Encyclopaedia

Atvirojo kodo programų privalumai organizacijose

Citata: CIO Magazine

"Major enterprises are running mission-critical functions on open-source IT. Big vendors have lined up to support it or port their applications to it. CIO's who have implemented it report significant reductions in total cost of ownership. Our conclusion? **CIO's who don't come to terms with this revolution will be paying too much for IT "**
